8th Grade Science Standards

8.0.1-Entire Unit

**As for Biology and Applied Biology, various concepts and standards are used in *The Leopold Education Project*. There are numerous examples to enhance understanding for these subjects. A highly recommended suggestion would be for the Biology and Applied Biology students to prepare, plan, and teach this education unit to the seventh graders. Both the high school and middle school students will meet their standards, enjoy their learning experience, and will have hands-on learning tools to help keep these concepts fresh and alive in their minds for longer periods of time. ☺ **
